## ARANDEE MAC Aircraft Hold Spray

### DESCRIPTION

Arandee MAC Aircraft Hold Spray is a non-flammable aircraft insecticide used in the disinsection of aircraft cargo holds and maritime, shipping containers. The product is formulated with an active ingredient of 2% w/w permethrin and 2% w/w d-phenothrin, recommended by the World Health Organisation.

Arandee MAC Aircraft Hold Spray is effective in killing a broad range of flying insects in aircraft cargo holds and shipping containers. These include; mosquitoes, fleas, ticks, cockroaches, ants, mites and wasps. MAC Aircraft Hold Spray is used to prevent the spread of vector borne and biosecurity diseases which can be harmful to humans, plants and animals.

MAC Aircraft Hold Spray is also approved for use as Bio-security protection during the unloading of maritime, shipping containers.

### FEATURES

- Non-flammable aircraft insecticide
- Residual and rapid knockdown providing total kill
- Available in single shot lock-down nozzle

### APPLICATION

For disinsection of aircraft cargo holds according to the World Health Organisation’s recommended disinsection procedures for ‘Aircraft Hold Disinsection’ spray methods. The MAC Hold Spray is suitable for use in confined spaces.
