## ARANDEE MAC Pre-Flight Spray

### DESCRIPTION

Arandee MAC Aircraft Pre-Flight Spray is a non-flammable aircraft insecticide used in the disinsection of aircraft cabins and flight decks, prior to the embarkation of passengers. The product is formulated with an active ingredient of 2% w/w permethrin, recommended by the World Health Organisation.

Arandee MAC Aircraft Pre-Flight Spray is effective in killing a broad range of flying insects in aircraft interiors. These include; mosquitoes, fleas, ticks, cockroaches, ants, mites and wasps. MAC Aircraft Pre-Flight Spray is used to prevent the spread of vector borne and biosecurity diseases which can be harmful to humans, plants and animals.

### FEATURES

- Non-flammable aircraft insecticide
- Residual, rapid knockdown and total kill
- Spray button has a large finger pad, for crew safety and comfort
- Available in a multi shot nozzle. Single shot lock-down variant available on request.

### APPLICATION

For disinsection of aircraft cabin and cockpit areas according to the World Health Organisation's recommended disinsection procedures for Pre-Flight or Pre-Embarkation spray methods. The MAC Pre-Flight Spray is suitable for use in confined spaces.

### PACKAGING / STORAGE

- Shelf Life: 48 months from date of manufacture
- 50 x items / carton

		Carton Details		
STOCK #	VARIANT/SIZE	QTY.	GR. WT. (KG)	Vol. (m <sup>3</sup> )
