

**TECHNICAL SPECIFICATIONS****ARANDEE MAC Cabin Spray (Top of Descent)****DESCRIPTION**

Arandee MAC Cabin Spray (Top of Descent) is a non-flammable aircraft insecticide used in the disinsection of aircraft cabins, with passengers and crew on board. The product is formulated with an active ingredient of 2% w/w d-phenothrin, recommended by the World Health Organisation.

Arandee MAC Cabin Spray (Top of Descent) is effective in killing a broad range of flying insects in aircraft interiors. These include; mosquitoes, fleas, ticks, cockroaches, ants, mites and wasps. MAC Cabin Spray (Top of Descent) is used to prevent the spread of vector borne and biosecurity diseases which can be harmful to humans, plants and animals.

FEATURES

- Non-flammable aircraft insecticide
- Rapid knockdown and total kill
- Spray button has a large finger pad, for crew safety and comfort
- Non-residual and non-cumulative
- Available in single shot or multi shot nozzles

**APPLICATION**

For disinsection of aircraft cabin and cockpit areas according to the World Health Organisation’s recommended disinsection procedures for “Blocks Away and Top of Descent” spray methods. The MAC Cabin Spray (Top of Descent) is suitable for use in confined spaces.
